Art Unit: 1761

1. The objection under 35 USC 132 for the insertions on pages 18 and 20 as introducing new matter into the disclosure is maintained for the same reason set forth in paragraph 1 of paper no 7.
2. Claims 1,22, 23-24 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant amended claim 1 and added claim 22 to recite the limitation ‘ said voids are generated by a quick action type chemical leavening agent’. This limitation is not supported by the original disclosure. While the specification discloses a combination of quick action type and delayed action type chemical leavening agents are used, there is no disclosure that the quick action type generate the void layers. The limitations in claims 23 and 24 are not supported by the original disclosure. Page 15 discloses uniform void layers can be formed among the dough layers after baking owing to the unreacted chemical leavening agent.

3. Claims 1-7 and 10-24 are free of prior art because applicant’s argument is found to be persuasive.
